There, John is she done!' said Joseph Broadley an intelligent boy of fifteen, as he pointed his friend to a very perfect model of a fore and-aft schooner, which he had just completed.

The miniature vessel stood upon the work-bench in his father's shop. The finishing touches had just been given to the work, and the young artisan surveyed his handiwork with conscious delight.

The Infant Drummer.

We find on our table a little pamphlet entitled " A memoir of Benson A. English, the Infant Drummer. by John Wood. From it we learn that this little boy was born in Macon, Georgia, in Feb., 1849, and that even in his cradle he commenced whistling tunes and beating time to music, before he could speak, having, while in his first year, surprised all his friends and those around him by whistling "A Life on the and neatly bound book. Ocean Wave," and, subsequently, beating time on the drum to his own whistling of that air. Since that time, his musical developement has continued with Law, New York. Redfield, Publisher, N. York.

Making all due allowance for the coloring of a friendly biographer, and, perhaps, the natural intensification which we must expect in a publication bearing, in some measure, the character of an advertisement, it yet remains beyond question that the early and apparently spontaneous exhibition of musical talent in this child, presents a phenomenon with few, if any, parallels. That the main facts of the "memoir" are in exact accordance with fact, is easily susceptible of proof; and, indeed, the evidences are presented very fully, as also the proofs of the estimation in which his performances have been held by discriminating audiences and distinguished musical authority. Upon the whole, the little drummer is an exceedingly interesting specimen of "Young America," and well worth seeing. This notice we make spontaneously, without being "drummed" into it, as is too often attempted to be done, and to which we

The following is an extract of a private letter from an intelligent American addressed to a gentleman in

Paris, Dec. 28, 1854.—I have had a long and interesting conversation with an officer of high rank who has just returned from the Crimea. He tells me that, including the Turks, there will be at this time one hundred and twenty-five thousand men in the Allied army before Sevastopol, and that they must send fifty thousand more to Perekop to shut out reinforcements coming to the Russians, for the belief now is that the place can only be taken by starvation. He says " if we take the outworks we have no Sevastopol even on the south side, as the Russians have erected new and very powerful forts to protect the city." These forts are stronger than those which the Allies have been attacking for months. As to on the great Southwestern route, or disposed to extort the reports of the town being in ruins, houses demol. an inordinate price for its services. Neither of these the reports of the town being in ruins, houses demolished, streets encumbered by dead bodies, &c. there alternatives would justify the Department in transis not one word of truth in them. The Allies are. in fact, the besieged. They are in a valley with heights strongly fortified that their position is impregnable, and an army of five hundred thousand men could not drive them out, though the Russians frequently bayonetted their very sentinels. There are very few Russian deserters or prisoners; they fight with great courage and die like soldiers. If the Russian officers and army had the same military talent and knowledge of war as the Allies, the latter would have been obliged to re-embark. In the last battle, if the two Russian generals (whom the Emperor has since disgraced) had followed up their first success, the victory, and a very decided one, would have been on the other side. At present the Allies cannot retreat from the Crimea; they must drive the Russians out, though it may cost them from one to two hundred thousand men, with an attending expense which is almost incredible, and probably will lead to a general war against them and the destruction of Turkey.

The typus fever rages in the Turkish camp, and the cholera has re-appeared in that of the Allies .-The weather was frightful, attended with heavy rain, severe cold, and raging winds; all of which may be expected to continue for nearly three months longer. All these plagues combined destroy a great number of lives. The English suffer more than the French. They have but few tents, have not the same care, and suprt the fatigues and dangers with less patience .-Both officers and men complain bitterly. The English are very brave, and go into battle as if on parade; receive two or three rounds from the enemy before they come into contact, as they move like a wall and are soldiers of "ancient days," without the improvement of modern times. The French, on the contrary, never give the Russians a chance for more than one, if even one, fire before they are at them : nor are they ever surprised. Their " soldiers of Africa" have been accustomed to ambuscades and surprises, and are always on the alert; but it is the contrary with the English, who have twice been surprised, and suffered severely in consequence, and on one occasion, would have been annihilated but for They are gloomy, dissatisfied, and have "nothing comfortable," as they bitterly complain. The Charleston Courier announces that the terms reconciliation between the Post Office Department and the South Carolina Rail Road, have been agreed on, and that we shall soon be favored with a restora-tion of accustomed mail facilities. It is somewhat re-markable that the censure of the Press has been bestowed with so little mercy upon the Postmaster General. while the Rail Road has escaped with some gentle insinuations that it ought to be more liberal and more considerate of public convenience

The Postmaster General distinctly averred, that he was restricted in the amount of compensation to be paid to the Rail Road, by act of Congress. The Rail Road on the other hand, was either unwilling to transport the mail, or unable to do so, at a price which s remunerating and satisfactory to every other Road cending the limitation on the compensation, imposed by Congress; and either of them presents the Rail Road in a very uneviable condition.

It will be in vain for the State to expend millions in constructing rail roads for the benefit of Charleston, if the citizens of Charleston either cannot or will not control them in exigencies such as this. Darlington Flag.

A Know-Nothing Legislature. The legislature of Massachusetts, which has just convened at Boston, is composed of "Know-Nothings." As this party have the field there entirely to themselves, it was a fair supposition that something startling and tremendous might be expected from their labors. Certainly an organization so terribly efficient in all respects as that of the invincible Know Nothings must achieve deeds in the legislative hall that would correspond to their works done at the polls. Of course, a banded and secret party, who have contrived by the effective appliances of portentous silence, significant ignorance and grim myster va promise and threaten unparalleled political results throughout the country, can do nothing less than accomplish an extraordinary amount of execution when convened in the councils of State. This is what we ought to expect, if we are to receive their declarations at par value. But let us look at the result in Massachusette.

GENTLEMEN, SENATORS AND DEPUTIES :- Since our last meeting great events have happened. The appeal which I made to the country to cover the ex. ises of the war was so well responded to that the esult even surpassed our hopes. Our arms have been victorious in the Baltic and in the Black Sea .-Two great battles have shed lustre on our flag. Striking testimony has proved the intimacy of our relations with England. The British Parliament has voted thanks to our generals and soldiers. A great empire, reinvigorated by the chivalrons spirit of its sovereign, has separated itself from the power which for forty years has menaced the independence of Europe.

"The Emperor of Austria has concluded a treaty defensive at present, soon, perhaps, offensive, which unites his cause to that of France and England. Thus, gentlemen, the longer the war continues the more numerous becomes the number of our allies, and the closer are drawn the bonds already formed. What firmer bonds can there, in fact, be, than those bearing the names of victories belonging to the two armies, and recalling a common glory ?-than the same anxieties and the same hopes agitating the two countries ?-than the same views and the same intentions animating the two governments in every corner of the globe?

[From the Daily Wisconsin, December 28.] A Milwaukle Rifle --- Ahead of the Minle.

A gentleman writes to the Chicaco Press an account of a new rifle invented by Mr. Howe, of this city, which he has seen, and thinks incontestably superior to the Minie. The announcement is comewhat premature, as the gun seen by this gentleman is imperfect in one or two little improvements, which will be completed in a short time, when full experiments will be made, with a view of testing accurately its capacities, that its full worth may be known; previous to which it has not been deemed advisable, by the inventor, to forestall the public mind with descriptions of what it will do, but has not done. However, since it has been brought before the public in our sister city, we may as well give a description of the rifle.

The one which we were shown is of small size, made for a hunting gun, and is imperfect in the cocking and capping arrangements, which will be a part of the sing e movement, raising the lower end of the barrel to receive the cartridge. Goods which have accumulated abroad where the demand had almost ceased, were crowded upon our shores, at whatever advance could be obtained, thus aggravating the evil. At that moment, instead of liberal

> shipments of breadstuffs to cover this new drain upon our resources, the exports fell off, owing to the high prices of cereals in the interior, and the great scarcity at the seaboard. The failure in the harvest here had been greatly exaggerated, and farmers were led to hoard their products. The cotton crop, part of which might have been relied upon in this emergency, was kept back by the dreadful ravages of the epidemic which prevailed in the vicinity of Southern ports. From New York, those who had contracted large foreign debts were obliged to send the spe cie, and this rapidly increased the evil. While this was going on at the seaboard, a worse panic began in the interior, and especially in the West and North west. Ohio, Indiana, Illinois, Michigan, Wisconsin, lowa and Missouri, and to some extent in the States on the South side of the Ohio, a large circulation of bank notes, mostly of the free banks, had been obtained through expenditures for Rail Road purpose, and general expansion of business. When the contraction began, this circulation came in rapidly, and found the banks wholly unprepared to meet it. As the difficulty became known, the excitement increased, and every effort made for relief only heightened the panic. All the banks which had balances at the East drew for them, and borrowed to the extent of their credit besides, while, between twenty and thiry, perhaps more, of institutions which were really solvent, were compelled to suspend payment. A large number of private bankers were carried down in the crash, and the distress became general. The panic mind is now less excited, but the difficulty is not removed, and cannot well be until there is a revival of business, by large shipments of the produce now hoarded. At the South the evil has not, as yet, been bridge and Lord Raglan :

upply of metalic currency remaining in the counry. Over one hundred millions dollars in gold currency have been added to the circulation of the Unied States, since the discovery of gold in California. Thus, although the rates of interest have been high for nearly eighteen months, there has been no such scarcity of money as has been felt in the former periods of commercial embarrassment. The impression now gradually mend.

[From the Fort Smith Herald of Dec. 16. BURNING OF A MOUNTAIN-PROSPECT OF A VOLCA-NO IN ARKANSAS - We learn from a gentleman in Scott county, that a mountain, about five miles from Waldren, has exploded three times during the last week. The explosions were very loud and terrific. causing the earth around to quake, throwing up stones and earth, and filling the atmosphere with clouds of dust and smoke. The report of one of the explosions was heard in the vicinity of this town a few mornings since, a distance of 45 or 50 miles. The earth on the mountain has sunk to a considerable depth. The people in the vicinity are very much alarmed. These are facts as far as we are able to learn : but we hope to hear more fully and particularly in a few days. What does it mean? Are we to have a volcano in our State belching forth fire and smoke, and hurling red hot stones in the atmosphere and filling the valleys around with melted lava.
